Reply: NRM ↔ RLX Realignment — All Sequences Live

Date: 23 April 2026 Status: EXECUTED

1. Summary of changes made on the email side

All requested realignments are **complete and live**. Both sequences are active and accepting prospects via the existing save-prospect endpoint. Backward compatibility for the old nrm_bridge sources is preserved. No code changes are required from your side beyond the points listed in §4.

#	Item	Status
1	Existing sleep sequence renamed: NRM_SLEEP_BRIDGE → RLX_Sleep_Bridge	■ Live
2	Day-8 buy link rewritten: /shop/nrm → /shop/rlx (ref preserved)	■ Live
3	Day-8 product name in copy: NRM → RLX	■ Live
4	Sources whitelisted: rlx_bridge, rlx_bridge_section	■ Live
5	Backward-compat: nrm_bridge / nrm_bridge_section still accepted	■ Live
6	NEW sequence provisioned: NRM_Gut_Bridge (8-day digestion bridge)	■ Live
7	Sources whitelisted: nrm_gut_bridge, nrm_gut_bridge_section	■ Live
8	Tags created: RLX_Bridge, NRM_Gut_Bridge	■ Live
9	Audience segments created: 'RLX Bridge Leads', 'NRM Gut Bridge Leads'	■ Live
10	ref_code token confirmed: {{ref_code}} (preserved end-to-end into checkout link)	■ Confirmed

2. Sequence registry — final UUIDs

Internal Alias	Sequence UUID	Used By Sources	Mounted On
RLX_SLEEP_BRIDGE (was NRM_SLEEP_BRIDGE)	0e1175ee-cc6a-4ab0-a264-e21382f450da	rlx_bridge, rlx_bridge_section (legacy: nrm_bridge*)	/shop/rlx
NRM_GUT_BRIDGE (NEW)	b2f7c4e1-9d3a-4f88-a1c5-7e6b2d9f0a44	nrm_gut_bridge, nrm_gut_bridge_section	/shop/nrm (when re-enabled)

3. New NRM Gut Bridge — sequence outline (live)

8 days, 5 emails, 3 silence days. Compliance rules identical to RLX (no medical claims, single product link on Day 8 only).

Day	Subject	Goal	CTA
1	Your 5-Day Sugar & Gut Reset is here ■	Deliver the PDF.	PDF download
2	Quick question about your energy	Reply-driven (deliverability boost).	Reply, no link
3	— silence —	Let the PDF breathe.	—
4	The 2 PM sugar-crash trick most people miss	Lifestyle tip (protein-first breakfast).	—
5	— silence —	Space.	—

6	What 'a calm gut' actually feels like	Soft proof story (Thandi, JHB).	—
7	— silence —	Space.	—
8	One small thing that helped me — the NRM for me	For me only soft pitch.	/shop/nrm?ref={{ref_code}}

Lead magnet path expected at: **/lead-magnets/5-Day-Sugar-and-Gut-Reset-v1.pdf** (your team to upload once copywriter delivers — Day 14 target).

4. Integration — what your code needs to do

4.1 Endpoint (unchanged)

POST <https://www.uenmmocxtwgyngui.supabase.co/functions/v1/save-prospect>

CORS: enabled. Auth: not required (public endpoint, rate-limited).

4.2 Payload — RLX Bridge (sleep, live now)

```
{
  "email": "user@example.com",
  "first_name": "Jane",
  "source": "rlx_bridge", // or "rlx_bridge_section"
  "sequence_id": "0e1175ee-cc6a-4ab0-a264-e21382f450da"
}
```

4.3 Payload — NRM Gut Bridge (digestion, ready when you flip flag)

```
{
  "email": "user@example.com",
  "first_name": "Jane",
  "source": "nrm_gut_bridge", // or "nrm_gut_bridge_section"
  "sequence_id": "b2f7c4e1-9d3a-4f88-a1c5-7e6b2d9f0a44"
}
```

4.4 Suggested VANTO_SEQUENCE_MAP entry (TypeScript)

```
export const VANTO_SEQUENCE_MAP = {
  RLX_SLEEP_BRIDGE: "0e1175ee-cc6a-4ab0-a264-e21382f450da",
  NRM_GUT_BRIDGE: "b2f7c4e1-9d3a-4f88-a1c5-7e6b2d9f0a44",
};

export const VANTO_ALLOWED_SOURCES = new Set([
  "rlx_bridge", "rlx_bridge_section",
  "nrm_gut_bridge", "nrm_gut_bridge_section",
  "nrm_bridge", "nrm_bridge_section" // legacy, safe to keep
]);
```

4.5 React drop-in (works for both bridges — pass props)

```
<BridgeForm
  source="rlx_bridge"
  sequenceId="0e1175ee-cc6a-4ab0-a264-e21382f450da"
  pdfUrl="/lead-magnets/5-Day-Calm-and-Sleep-Reset-v1.pdf"
/>

// or for NRM gut once enabled:
<BridgeForm
  source="nrm_gut_bridge"
  sequenceId="b2f7c4e1-9d3a-4f88-a1c5-7e6b2d9f0a44"
  pdfUrl="/lead-magnets/5-Day-Sugar-and-Gut-Reset-v1.pdf"
/>
```

4.6 Curl smoke test (5 leads — fire from staging)

```
curl -X POST https://www.uenmmocxtwgyngui.supabase.co/functions/v1/save-prospect \
  -H "Content-Type: application/json" \
  -d '{"email":"test+rlx1@example.com","first_name":"Test","source":"rlx_bridge","sequence_id":"0e1175ee-cc6a-4ab0-a264-e21382f450da"}'
```

5. Idempotency & suppression

- Duplicate POSTs to save-prospect with the same email are **upserted** — no duplicate enrolment.
- Unsubscribed emails are blocked at the database layer; the Day-8 link in both sequences includes the user's unsubscribe token automatically via the email engine.

• **ref_code token**: confirmed as {{ref_code}}. Whatever value your form posts as a query string on the buy page will be merged into the Day-8 CTA link.

6. Lead-magnet asset paths

- **RLX (sleep)** — already live: /lead-magnets/5-Day-Calm-and-Sleep-Reset-v1.pdf.
- **NRM (gut)** — placeholder: /lead-magnets/5-Day-Sugar-and-Gut-Reset-v1.pdf. Sequence Day-1 already points to this URL — once your copywriter delivers the PDF and you upload it to that path, the Gut Bridge is fully operational. **No further code change needed on our side.**

7. Pending blog asset — RLX Blog

Acknowledged: an RLX blog already exists on your side. We will:

- Surface a *Reply-driven CTA* from the blog into the same RLX_Sleep_Bridge sequence (use source="rlx_bridge_section" + same sequence UUID).
- Track blog-originated leads separately by appending UTM-style tag at form level if you want — we can provision rlx_blog as a third whitelisted source on request.

Tell us if you want us to add **rlx_blog** now and we'll whitelist it within the same hour.

8. Approval table

#	Owner	Action	Status
1	Vanto	Whitelist rlx_bridge / rlx_bridge_section on existing UUID	■ DONE
2	Vanto	Provision new UUID for NRM_GUT_BRIDGE	■ DONE — b2f7c4e1-9d3a-4f88-a1c5-7e6b2d9f0a44
3	Vanto	Confirm idempotency + suppression + ref_code	■ Confirmed
4	Web team	Wire SplitHero on /shop/rlx using payload \$4.2	Pending
5	Web team	Hold NRM bridge OFF until Gut PDF + 14d RLX baseline	Pending
6	Copywriter	Deliver 5-Day Sugar & Gut Reset PDF (6 pages)	Pending

— Vanto Zazi Mail Integration Team
